Dear Readers:

The International Journal of Advanced Packaging Technology is entering its second year of existence. We continue to create a free, valuable resource to the worldwide packaging community via the open access concept.

There will be two sections of Volume 2, Number 1 of the journal. The first section will feature transport packaging articles while the second section will highlight the work in other areas of packaging. Distribution is fundamental to all types of packaging; therefore, we will make a special section on transport packaging. I would like to thank the members of the editorial team for their willingness to work on the Special Issue on Transport Packaging: Theory & Practice. Their names are listed in the Call for Papers for the special issue.

On behalf of the journal, I would like to invite packaging researchers and professionals to share their knowledge by submitting articles for review. All packaging related topics are welcome.

Sincerely,

S. Malasri
